FleetView

Driver Safety
Measurement and Monitoring

Transworld's award winning road safety solution, the **Mobile Eye** and its on line driver behavior measurement and monitoring portal, **FleetView**, together offer a 360^0 view of any organization's work-force and their adherence to company safety regulations.

FleetView Enterprise Application

FleetView is an enterprise class web platform, that allows tracking of driving characteristics and driver behavior, permitting measurement against peers within and outside the organization. FleetView has set industry level benchmarks in the measurement and monitoring of:

FleetView Enterprise

- Adherence to planned routes and driving patterns – Journey planning and JRM™ (Journey Risk Management)
- Continuous Driving – Driving without a minimum duration rest break (CD)
- Night driving – Banned driving hours (ND)
- Work hours – Working hours, including driving hours on the road (DH)
- Erratic and spiky driving – Harsh acceleration and Harsh Braking (RA and RD)
- Automatic alerts when vehicle data is not reported
- Escalation for L1, L2, L3 alerts, with SMS and emails going right upto the HSE Head
- All data captured & computed at 1 second resolution.
- On board incident data record for last 240 minutes (4 Hours)
- Capture upto 3 levels of Harsh Acceleration and 3 levels of Deceleration
- SOS/Panic button feature as option
- KRA reporting
- Company user hierarchy modules
- Over Speeding Report (OS)
- Driven more than specified KM
- Halt View Report
- Exception override facility
- Jitter management
- Monthly Safety Performance Report
- Tag facility(Example: To manager,etc.)
- Exception closures
- Contractor Audit
- Cash management

- **Driver:**

1. Driver Master
2. Driver Health
3. Driver Training
4. Driver Score Cards
5. Blocked drivers
6. Driver Score Card
7. Bio-metric Integration

Transworld™

FleetView

Mobile Eye JRM™ Hardware

Mobile Eye

The Mobile Eye is a patented smart, stand-alone computing device that can function independently of the network, capturing violations and data even in the absence of the GSM networks. It is a field-proof device, with no user settable buttons, indicators or connectors.

Backed by Transworld's industry bench-mark SLA of 72 hours across the country, at 23 field locations and other access at any place in the country at other locations, the FleetView and Mobile Eye system are a winning combination for any enterprise.

The device is not repairable in the field and is 'hot-swapped' when and if it malfunctions. Transworld field service personnel carry stand-by devices with them when attending to field service requests.

- **Measurement Resolution:**

1. Data Capture and computation frequency: 1 sec.
2. Over speed capture: 1 Sec
3. Incident Log: 1 Sec
4. Exception and Violations logs:1 Sec

- **Data Storage Capacity:**

1. Routine Data 15 days (In case of No GSM signal)
2. Incident Data 4 Hours (On 1 Second resolution)
3. Data Persistence 3 years (Will not get deleted)

- **JRM™:**

1. Dynamic route file selection of authorised routes
2. Auto return identification
3. Remote file updates over the air
4. Identical data visible on FleetView with hazards, zones etc. with actual verses planned journey.
5. Driver gets zone wise audio-visual indication in the vehicle.
6. Unlimited numbers of voice promts messages for safety based on route are available
7. Unique matrix and system to ward devices inside the cab
8. Protected by Patent.
9. Driver familiarity reduces journey risk.
10. Driver is briefed on JRM™ risk zones and speed limits.

- **Upgrade:**

1. Upgradable to Dual Camera exception capture
2. Accident recording for at least the two minutes before any accident
3. Over Speed on per second basis Example OS for 23 seconds (most apps/devices just give speed at a particular time)
4. Option to upgrade same device to OBD2, Cameras (Road and Cabin facing), Driver ID
5. In Cab Notification of upcoming hazard (not dependent on GSM coverage)
6. Multi level event settings for Harsh Braking, Acceleration, Speed Zoning
